

# Point Of Banking

A Cashless ATM Solution For Casinos

**EBS** EVIDENT  
BUSINESS SOLUTIONS

# What is Point of Banking?

Point of Banking (cashless ATM) system supports authorized PIN-based card transactions: ATM/debit cards allowing your players the ability to withdraw funds directly at the card table, increasing player spending with every transaction.

- A voucher and receipt is printed and exchanged for casino chips
- Players pay a small convenience fee per approved transaction
- Casino receives a portion of the profit received from each approved transaction
- Casino can monitor their transactions online immediately
- Casino receives electronic deposits directly to their business checking account

# Benefits

- **Increase Game Play**
  - Transactions occur during hand break/buy-in allowing players to access their funds without leaving the game. Since no cash is involved, there are no requirements for cash transaction reporting.
- **Responsible Gaming**
  - Our solution restricts players to the use of debit cards only and prohibit the use of credit cards or the ability to overdraw checking accounts that incur debt.
- **Detailed Reporting**
  - Provides internal management and accounting that is easy to implement and manage for casino operators. Transaction information is made available to the casino, allowing for Real-Time information reporting and/or inquiry.
- **Revenue Sharing**
  - As of 2020, we are the only company in the industry offering revenue sharing for point of banking/cashless ATM systems.

# Revenue Sharing

Our revenue sharing program is simple, we process the transaction with the bank and charge a fee to each customer for our service. Each month the total number of approved transactions are calculated and a portion of those fees are shared back with the casino

Number Of Terminals	10
Revenue Share	\$0.50
Equipment Investment	\$5,000.00

Example	A	B	C
Transactions/Day	3	5	10
Revenue/Mo	\$456.25	\$760.42	\$1,520.83
Revenue/Annual	\$5,475.00	\$9,125.00	\$18,250.00

All examples, charts, and graphs that depict future values, expenses or other estimated numbers are hypothetical in nature, and are not intended to be actual future numbers, but rather an estimation based on reasonable assumptions. Actual results will vary; even a slight difference in the assumptions used can produce vastly different results.
